

Murray's
Dental Seating

Murray's Dental Seating

▶ Murray Equipment Ltd was established in 1953 and is a respected manufacturer of dental seating and for clinical departments within the NHS.

▶ Murrays provide exceptional value and high quality products. Our ergonomically designed seats reduce back and shoulder pain, especially for clinicians who have to sit for long periods, or in specific positions. Our seats are typically used in all therapy areas: **Dentistry, Laboratories** and many more clinical departments throughout hospitals with in the UK.

▶ All products comply with fire safety regulations, CE Medical Devices 93/42/EEC and ISO 9001. All our seating is free from latex. The upholstery has an antifungal backing and is breathable, wipe clean and impregnated with antibacterial agents at the point of manufacture. We also stock Belmont, A-dec, Anthos, Planmeca, Sirona and Technodent.

▶ Murray's seating is hand made at our factory in Chichester, therefore all our chairs are made to order. A range of optional extras and a wide choice of colours means that you have the flexibility to purchase the seating you need to meet your exact specification. We are so confident in the quality of our products we provide a **five year guarantee** across the range.

Key areas to consider

Typical plastic base

Murray's wipe clean base

Underside upholstered

Key areas that are considered extremely important when choosing our seating

► Infection Control

The vinyl we use is impregnated with anti bacterial agents during the manufacturing process and an anti fungal backing is used on the material. The base of the chair is strengthened by a T bar which makes it very easy to clean. This is superior to the base that is normally used with office furniture which has a honeycomb effect underneath to strengthen it, which provides a perfect place for bacteria to breed. Murray's bases are also light in colour so that any dirt or blood is easily identified and cleaned. We even upholster the underside of the chair for easy cleaning. In addition our chairs are 100% Latex free including the castors.

► Posture

Our seating is ergonomically designed to promote the best posture possible. This is achieved by the shaping of the chairs and high quality chassis that offer full and independent adjustment.

► Cost saving

Correct seating will reduce back pain, fatigue and long term RSI issues, which will save vast amount of money over the years by reducing absences from highly paid and trained clinicians. This was highlighted by a three year clinical study at Nottingham University Hospital; this study was only completed with one clinical therapy area, yet applies to all clinical therapy areas. More information is available on request.

► Security

Colours are often used to identify to which department or surgery the chair belongs.

► Guarantee

All our stools are covered by our five year guarantee.

Helping you choose the right seating

Throughout the brochure you may come across terms that do not mean anything to you, therefore please see our jargon buster below, which is intended to assist you to choose the correct seating. The use for each model that is described throughout the brochure is only intended as a guide.

► Height Range

This is the adjustable height range of the cylinder from the lowest to the highest point, measured from the floor to the top of the seat pad.

Our seating is normally supplied with the option of a standard or high cylinder; however, if required, we are able to supply a lower or higher option. Should this be required, please contact us for details. An adjustable foot ring/rest is supplied as standard when ordered with a high cylinder - whilst not recommended this may be removed if required.

High cylinder highest point

Standard cylinder highest point

High cylinder lowest point

Standard cylinder lowest point

Our chairs are fully adjustable so please do not dismiss the comfort of a chair until it's been fully adjusted to suit the individual user.

► Weight capacity - Gas cylinder

Cylinders have been tested to hold a weight of 22 stones but this may be increased if required. Detail are available on request.

► Tilt facility

The seat pad tilts back and forth to enable pelvic movement, which helps promote a good neutral spinal position.

On all models, where applicable, except the SGEM-GT, the back rest and the seat pad can be independently adjusted and used in a free floating position or locked.

Helping you choose the right seating

Fully adjustable Back Rest

► Rake Adjustment

Spring loaded adjustable movement. This can be in a free floating position, which means, as the operative leans back and forth, the back rest will move with them providing continued support; alternatively it can be locked into position.

► Height Adjustable Backrest

This is raised manually up and down, to achieve the correct position for the lumbar support, and then locked into place

► Double Curvature

This means a contoured moulded seat pad.

► Restraint Castor

These act on vinyl flooring, similar to a normal free wheeling castor would act on a carpeted floor. This helps prevent the chair/stool skidding away from the operative, whilst giving freedom of movement.

All our chairs/stools are fitted as standard with **Restraint Castors or Static feet**. However, we have a full range of locking castors; please refer to the optional extras on pages 14-15 for a detailed description of their functions.

► Foot Height Control (FHC)

This is an optional extra (see page 14) that enables the height range of the seat to be adjusted with the foot, instead of a hand lever. This can be fitted to all models.

► Material

All products comply with fire safety regulations and ISO 9001. All our seating is free from latex. The upholstery is breathable, wipe clean and impregnated with antibacterial agents at the point of manufacture. Murrays offer a choice of 85 colours, all included in the price (see page 16). It is common practice that the colour is used as a device to identify which department or surgery the chair/stool belongs to.

► The Base

of the chair is powder coated aluminium, which can be upgraded to polished aluminium.

Polished aluminium base

Many other bases are strengthened by a honeycomb effect on the underside creating an ideal place for bacteria to breed.

Typical honeycomb base

Our base is strengthened by a T structure which gives a smooth clean surface to wipe clean.

Murray's base

Gemini Range

SGEM-GT

► The SGEM-GT is our entry level of chair, offering a synchronised, tilt facility for the seat pad and backrest. This means that the operative can adjust the tilt of both seat pad and back rest with one handle this chair can be fitted with adjustable arms. See optional extras on pages 14-15.

► The HGEM-SAB is a specialist stool. Whilst the back rest will act as a lumbar support, it has been designed for an operative that requires a moveable arm, without having to leave the stool.

The arm can rotate 360 degrees, which provides an arm with one swift movement. Also the arm has a ratchet system allowing it to move closer or further away from the operative. It will also wrap a round in front of the operative providing a torso butt, without having to straddle the seat.

This is very popular with Dental Nurses.

HGEM-SAB

Round stool with 360° swing around backrest.

Gemini Range

HGEM-SAB

Code	Model Description
HGEM-SAB	Round stool with 360° swing around backrest. Adjustable high cylinder and foot ring. No tilt.
Height range	High cylinder 560 - 760mm Approximate height ranges are measured from floor to top of seat pad.

SGEM-GT

Code	Model Description
SGEM-GT	Gemini chair: Adjustable tilt and backrest. Adjustable standard height cylinder.
Height range	Standard cylinder 450 - 590mm Approximate height ranges are measured from floor to top of seat pad.

Advance Range

HADV-GN

► The HADV-GN is a round stool with a fully adjustable back rest, without seat pad tilt facility, and is available with standard or high cylinder.

► The SADV-GT has a double curvature seat pad, with injected moulded foam, providing extreme comfort for the dentist who has to sit for a long period of time.

It has a fully adjustable backrest with tilt, as does the seat pad. The back rest and the seat pad both tilt separately and can be fully adjusted to provide maximum comfort and support. This range can be supplied with a standard or high cylinder. Available with arms as optional extras - see pages 14-15.

SADV-GT

Advance Range

SADV-GT

Code	Model Description
SADV-GT	DC seat. Adjustable tilt and backrest. Adjustable standard height cylinder.
Height range	Standard cylinder 480 - 620mm Approximate height ranges are measured from floor to top of seat pad.

HADV-GN

Code	Model Description
HADV-GN	Round seat with backrest. No tilt. Adjustable high cylinder and foot ring.
Height range	High cylinder 560 - 760mm Approximate height ranges are measured from floor to top of seat pad.

Posture Range

The Posture range has been designed for the operative who needs to work close to the patient. The front edge of the seat has been cut away to encourage the legs to drop sideways rather than reaching forward. Whilst this range is likened to the saddle seat, it is not as harsh, therefore providing a broader appeal.

► The HPOS-SAB, is the same as the Gemini SAB, but includes the Posture seat pad which provides a static tilt facility.

POS-DC

► The POS-DC has a fully adjustable back rest and seat tilt facility, enabling a good neutral sitting position.

POS-SAB

Posture Range

POS-DC

Code	Model Description
POS-DC	DC seat. Adjustable tilt and backrest. Adjustable high cylinder and foot ring.
Height range	High cylinder 520 - 720mm Approximate height ranges are measured from floor to top of seat pad.

POS-SAB

Code	Model Description
POS-SAB-H	DC seat. 360° swing around backrest. Static tilt. Adjustable high cylinder and foot ring.
Height range	High cylinder 550 - 750mm Approximate height ranges are measured from floor to top of seat pad.

POS-SAB-S

Stools & Saddle Seats

MUR-SADD-H

Our research and development has shown that a round stool does not promote good posture so **we have developed a range of stools which will promote a far better posture for the dentist.** We still offer a round stool but would encourage and advise purchasers to look at the alternatives that we have to offer:

► The Saddle stool helps to maintain an upright posture when seated with the pelvis held securely in a neutral position. The Saddle stool is available with a standard height or high cylinder. Typically used in Radiography, Dentistry, Theatres and in Laboratory departments.

► The Posture stool (POS) with the tilt facility has proved to be a very popular choice. The Advanced DC range has appealed to clinicians and staff who prefer a larger seat pad.

► All stools can be fitted with a foot height control - see optional extras on page 14.

HADV-NB

Stools & Saddle Seats

MUR-SADD-H

Code	Model Description
MUR-SADD-H	Saddle seat without backrest. Adjustable tilt facility. Adjustable high cylinder and foot ring.
Height range	High cylinder 550 - 750mm Approximate height ranges are measured from floor to top of seat pad.

POS-NB

Code	Model Description
POS-NB	DC seat without backrest. Static tilt. Adjustable high cylinder and foot ring.
Height range	High cylinder 520 - 720mm Approximate height ranges are measured from floor to top of seat pad.

HADV-NB

Code	Model Description
HADV-NB	Round seat without backrest. No tilt. Adjustable high cylinder and foot ring.
Height range	High cylinder 540 - 740mm Approximate height ranges are measured from floor to top of seat pad.

SADV-NB

Code	Model Description
SADV-NB	Round seat without backrest. No tilt. Adjustable standard height cylinder.
Height range	Standard cylinder 450 - 590mm Approximate height ranges are measured from floor to top of seat pad.

Optional Extras

Code	Description
LL Castors	Load Locking Castors provide ease of movement from one place to another. Castors lock automatically when weight applied.
un-LL Castors	Un-Load Locking Castors provide stability at the point of sitting in the chair. Castors unlock automatically when weight applied providing movement while working.

Code	Description
Glides	Glides (Static Feet) plastic feet, to provide a static stool at all times, typically used in Laboratories. Supplied in lieu of standard castors.

Code	Description
FHC	Foot Height Control (FHC) This is an optional extra that enables the height range of the seat to be adjusted with the foot instead of a hand lever. FHC can be fitted to all models.

Optional Extras

Code	Description
	Adjustable Arm A basic arm that is height adjustable via a ratchet system, as an upgrade and can also be provided with a swivel action. Upholstered to match the chair. Available for Posture and Gemini.
Adjarm	Height adjustable arm no swivel
Adjarm-SA	Height adjustable arm with swivel
Removable-SA	Removable adjustable arm with or without swivel

Code	Description
Ali Base	Polished Aluminium Base This is an optional extra available for a minimum additional cost.

Code	Description
Ft-ring	Adjustable Foot Ring Supplied as standard with high cylinder. Can be supplied as an optional extra on a standard height cylinder.

Our standard upholstery shades meet the strict fire and safety regulations and are tested to Crib 5. Colours depicted may not be an exact representation of the actual material used but are the closest possible using litho printing. Please ask for a swatch for colour matching.

Testimonials

“At Hague Dental Supplies, we have been supplying Murray stools to our customers for over a decade. During this period, a problem has been exceptionally rare, and there has never been a problem that wasn't rectified immediately.

Murray Equipment offer a good value range of stools to match most manufacturers' colour schemes. This means that the dentist can be offered a high quality alternative product, to the main equipment suppliers' often limited range, without upsetting the aesthetics of the surgery.”

Hague Dental Supplies, South London

“Murray Equipment are an extremely efficient and professional company to deal with. Always helpful and adaptable. Offering a reliable and wide range of stools to suit all individual needs. We are pleased to be associated with their name.”

Dental Integrated Systems Ltd, Plymouth

“We here at Promec Dental have always found Murray Equipment to be accommodating, helpful and prompt on deliveries. The quality of manufacture against value for money makes Murray Equipment an obvious choice.”

Promec, Kinver, West Midlands

“An excellent well made product, with a large variety of colours. Complete with a good customer care service which gives a good all round package.”

DB Dental Equipment Ltd, West Yorkshire

“Bondent has been a supplier of Murray stools for many years and has always been impressed by their quick response and the quality of their products. If you're looking for stools, make Murray Equipment your number one choice.”

Phil Beard, Bondent UK Ltd, Teddington

“Dentaquip has been purchasing equipment from Murray Equipment for over 20 years. During this time we have found their products to be robust and extremely reliable. These factors together with the obvious quality and attention ensure that the end user can be confident of receiving a product that delivers up value for money each time they buy from the range.”

Tom Kennedy, Dentaquip, Northern Ireland
