

Thackeray Dental Care

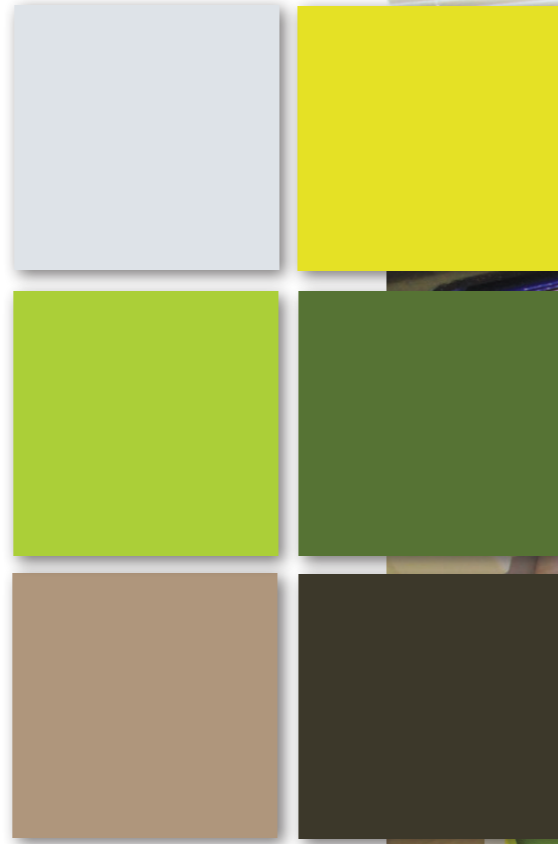

Since qualifying in 1991, Simon Thackeray has worked as a Clinical Assistant in Orthodontics and has taught at a Dental Hospital in Sheffield. He bought his existing practice in 1997; Thackeray Dental Care in Mansfield.

“When planning a surgery refurbishment, my advice definitely would be to visit the Showroom and take your nurse! What works for you might not work for the nurse, and what appears to be a great design might be ergonomically unsuitable. And it’s certainly worth going for the best quality you can. Finally, experiment with different layouts in the Showroom in order to get it right, even if that means discarding traditional layout ideas.

With regards patient opinion, they love it! The arm-suspended 22” TV which doubles as a Playstation, Bluray and Radiograph gets most comment, closely followed by the massively comfortable chair. Adding LED lights to the cabinetry changes the ambience of a surgery, which has also drawn comment. The green is a very striking colour for the chair, and has only had positive remarks.”

“It has felt that I have been assisted by a team of friends who shared the common goal of making my practice what I envisioned.”
- Simon Thackeray, Thackeray Dental Care
